

Think Fleet First.

HVAC and Energy

Our leadership in the high efficiency boiler system and large pump market includes design assistance, fully integrated system design, and controls and instrumentation.

BOILER SYSTEMS

Aerco International

High efficiency modulating and condensing gas-fired fire-tube hydronic heating boilers. Vertical heat exchangers for clean steam, high temperature hot water & steam-to-water applications.

Unilux/Evolv Industrial Boilers

High performance hot water and high pressure steam bent watertube boilers. NYC and UL Listed for packaged and field erected installations. Sizes from 200 BHP to 2000 BHP.

Tekworx

Plant master & optimization systems, touch screen graphical interface, web based monitoring & control.

Heat-Fab

UL1738 listed AL29-4C stainless steel venting and chimney liners for high efficiency gas-fired appliances.

Weishaupt Burners

High efficiency, low emission burners for retrofit and new installations. NYC DEP approved for natural and digester gas, oil, and dual fuel operation.

Heat Sponge Heat Recovery Economizers

Condensing economizers, feedwater heaters, and waste heat recovery systems for commercial, institutional, and industrial applications.

NATURAL GAS & PROPANE SYSTEMS

Spencer Turbine

NYC Approved natural gas booster systems and controls. GasCube factory prepackaged systems.

Standby Systems

Propane vaporizer-mixer and delivery systems for dual-fuel and alternate fuel source applications.

HEAT TRACING & LEAK DETECTION

Raychem Heat Tracing

Self-regulating heat tracing and controls for freeze protection on exterior piping, snow & ice melting.

Raychem Floor Warming

Mid-intensity floor warming systems for floor heating and tile warming applications.

Tracetek Water and Oil Detection

Water detection for data centers, comm. equipment rooms, trading floors and critical workspaces.

Oil and chemical detection systems for underground piping and storage tanks.

HYDRONICS

Peerless Pumps

Industrial-grade HVAC pumps up to 500 PSIG working pressure and 23,000 GPM. Horizontal split case, end suction, inline and vertical turbine designs.

Weinman Pumps

Splitcase, inline, end suction pumps for flows up to 9000 GPM, working pressures up to 400 PSI.

SyncroFlo

Variable speed drive sequencing and control systems. Custom fabricated packaged HVAC pumping systems, factory tested.

Amtrol

ASME rated expansion tanks & air separators.

Plate Concepts

Plate & frame heat exchangers for high pressure and free cooling applications, pressures up to 400 PSIG.

Tekleen

High efficiency self-cleaning water filter systems for cooling towers and condenser water.

EQUIPMENT PROTECTION

HVAC AND ENERGY

PENTHOUSE-GRADE SYSTEMS
