## Plumbing & Fire Protection Systems

We offer design assistance for the most efficient application of the following engineered products and systems.

### PUMPS & SYSTEMS

#### Peerless Pumps

Fire, vertical turbine, single and multistage horizontal split case, end suction, sump and sewage pumps. Hydroconstant variable speed drives. Pre-fabricated constant pressure pump systems.

#### Flygt

Submersible wet/dry pit, dewatering, sewage, propeller, cutter and grinder pumps. Submersible mixers and controls.

#### SubRig

Prefabricated, pre-engineered sewage and sump pit piping and aluminum diamond plate cover system.

#### SyncroFlo

UL/ETL certified constant and variable speed packaged fire and domestic water pressure booster and house pump systems. Pre-fabricated pump houses.

#### Stancor

Submersible elevator pit pump with "Oil-Minder Control System" automatically pumps water without danger or ejecting oil, in accordance with ASME A17.1.1.

#### MultiTrod

Liquid level monitor and control systems for sewage and clean water applications to 212° F.

#### Hush-Pumpy

Acoustically isolated pumping systems for discriminating high-end residential applications.

### WATER HEATERS & HEAT RECOVERY

#### Aerco

High efficiency semi-instantaneous water heaters for gas, steam, and water-to-water applications.

#### DHWG Systems

Prefabricated duplex indirect DHW systems optimized for low mass condensing boilers.

#### Hubbell Water Heaters

Cement lined and copper silicon type water heaters for electric, steam, solar, water-to-water, and condensate heat recovery. Available in both storage tank type and instantaneous type.

### HEAT TRACING & WATER DETECTION

#### Raychem

HWAT heat tracing systems for hot water temperature maintenance. The HOT answer to low flow fixtures and the 2008 NYC code requirements

XL-TRACE heat tracing systems for piping freeze protection. Monitoring systems for life-safety piping applications.

XL-TRACE grease disposal and fuel oil piping flow maintenance.

#### Tracetek

TRACETEK water detection for RPZ backflow preventer, water heater, and other leak sensitive applications requiring immediate alarm and/or automatic valve shutdown.

### VALVES, CONTROLS & PROCESS

#### Amtrol

ASME rated hydro-pneumatic expansion tanks & air separators.

#### American Valve

Ball valves with lever and gear operators, pneumatic, hydraulic and electric actuators, ½" to 10" teflon fused ball, cast iron, ductile iron & stainless steel, up to 300 PSIG MWP.

#### Aquafine

UV water disinfection and purification systems.

#### Singer Valve

Pilot operated automatic control valves for pressure regulation & level control, ½" to 24", cast iron, bronze & stainless steel up to 600 PSIG MWP. Lifetime seat replacement warranty.

#### Tekleen

Self cleaning water filter systems. Fully packaged with controls.

#### Tank Level Controls

Domestic, fire, sump, sewage, and tank valving and level control systems. Sensors and controls suitable for applications up to 212° F.

#### Reclaim & Re-Use Systems

Integrated level controls, tanks, and valving for safe and reliable operation of gray, black, and rainwater reuse systems.

### NATURAL GAS & PROPANE-AIR

#### Spencer Turbine

NYC Approved natural gas booster systems and controls. GasCube factory prepackaged systems.
